FluoroPharma Medical, Inc. to Present at Two Conferences Next Week

CEO Thijs Spoor to Provide Business and Portfolio Updates at Biotech Showcase 2013 & OneMedForum SF 2013

MONTCLAIR, NJ -- (MARKETWIRE) -- 01/02/13 -- FluoroPharma Medical, Inc. (OTCQB: FPML), a company specializing in the development of novel diagnostic imaging products that utilize positron emission tomography (PET) technology for the detection and assessment of disease before clinical manifestation, today announced that Thijs Spoor, Chairman, CEO and President of FluoroPharma Medical, will be presenting at two conferences in San Francisco on January 7 & 8, 2013.

Mr. Spoor's presentation schedule is as follows:

Conference: Biotech Showcase 2013

Date: January 7, 2013

Location: Parc 55 Wyndham

Time: 11:00AM PST

Conference: OneMedForum SF 2013

Date: January 8, 2013

Location: Sir Francis Drake Hotel

Time: 10:20AM PST

Mr. Spoor will also be available for separate one-on-one meetings throughout both days and on Wednesday, January 9.

About FluoroPharma Medical

FluoroPharma is a biopharmaceutical company engaged in the discovery and development of proprietary PET imaging products to evaluate cardiac disease at the cellular and molecular levels. The Company has licensed technology from the Massachusetts General Hospital in Boston.

The Company's goal is to enable personalized medicine through precision diagnostics that will help the medical community diagnose disease more accurately at the earliest stages, leading to more effective treatment, management and better patient outcomes.

FluoroPharma's initial focus is the development of breakthrough positron emission tomography (PET) imaging agents and is advancing two products in clinical trials for assessment of acute and chronic forms of coronary disease. These first in class agents have been designed to rapidly target myocardial cells. Other products in development include agents for detection of inflamed atherosclerotic plaque in peripheral arteries, agents with the potential to image Alzheimer's disease and agents that could potentially be used for imaging specific cancers.

In addition to the United States, Europe and China, patents related to FluoroPharma's portfolio of imaging compounds have been issued in Japan, Canada, Australia, Finland, Portugal, Ireland and Mexico.

Forward-Looking Statements

Except for historical information contained herein, the statements in this release are forward-looking. Forward-looking statements are inherently unreliable and actual results may differ materially. Examples of forward looking statements in this news release include statements regarding FluoroPharma's research and development activities and anticipated operating results. Factors which could cause actual results to differ materially from these forward-looking statements include such factors as significant fluctuations in expenses associated with clinical trials, failure to secure additional financing, the inability to complete regulatory filings with the Food and Drug Administration, the introduction of competing products, or management's ability to attract and maintain qualified personnel necessary for the development and commercialization of its planned products, and other information that may be detailed from time to time in FluoroPharma's filings with the United States Securities and Exchange Commission. FluoroPharma undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
