*The **Real-Time** Information
Sharing Interoperability Network*

COPsyncTM
FOR OFFICERS BY OFFICERS

*One Network Connecting Law Enforcement*TM

The COPsync Story

In August 2000 an officer lost his life during a traffic stop for a seatbelt violation. The investigation revealed that the violator was a known threat to law enforcement. The founders of COPsync, officers themselves, learned of this tragedy, decided never again and COPsync was born.

Today, the COPsync Real-time information Sharing Network connects more agencies and more officers than any other law enforcement system.

COPsync brings officer safety, department interoperability, open communication and cost saving efficiency to departments across the United States.

Mission

To create value by enabling law enforcement officers and other security professionals to interdict crime and criminal activity more effectively and efficiently, thereby protecting lives and property.

Innovation at the Point of Incident

COPsync's suite of sole source solutions establish a new standard of features and performance for patrol vehicle technology.

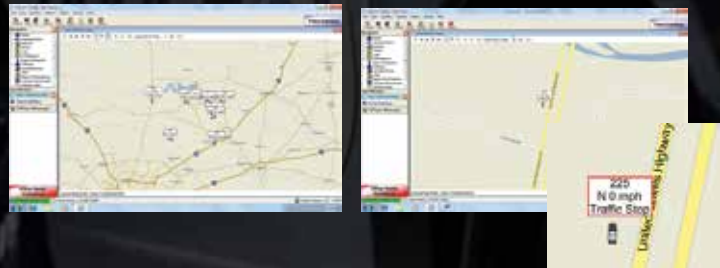

Only On The COPsync Network

COPsync's in-car solutions use technology as armor. Eliminate manual processes, increase officer productivity, reduce unsolved crimes and assist in apprehending criminals and interdicting criminal behavior. With life saving features such as auto vehicle locator, BOLO, distance based alerts, officer notes, messenger and map-based messaging COPsync is... Electronic Body Armor

SAFETY

Auto Vehicle Locator (AVL)

Map officer's location and view their activity in real-time.

BOLO

Protect your officers with real-time warnings of people, places, vehicles and objects of interest.

Distance Based Alerts

Get back up at the push of a button!
If an officer needs help, the five closest officers are alerted by one simple click.

Officer Needs Assistance

Real-Time Interoperability and Information Sharing Applications that Connect Officers and Agencies Across the Nation

COMMUNICATION

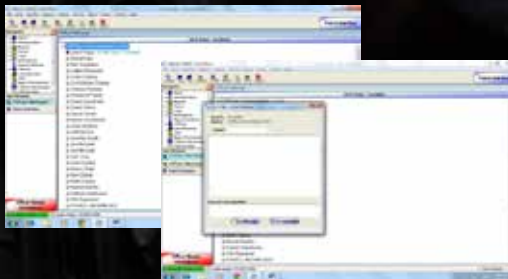

COPsync911 Alerts

Real-time alerts directly to officers if a community building is under threat.

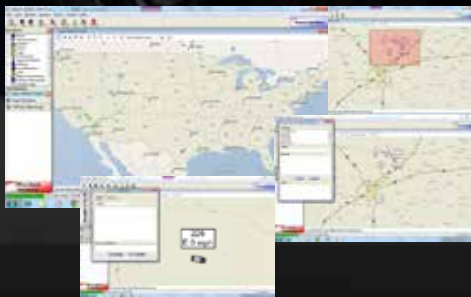

Messenger

Instantly communicate with any of the thousands of officers on the network.

Map-based Messaging

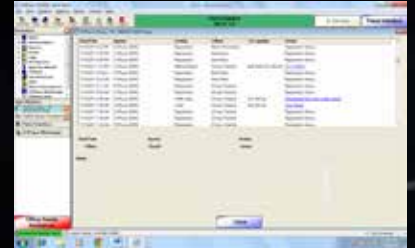

Instantly communicate with one unit or many based on their map location.

INTEROPERABILITY

COPsync History

A complete non-adjudicated log of any encounter a person may have with law enforcement. See past citations, arrest reports, crash reports, etc. Review officer notes created for the next officers' information.

Officer Notes

Officers create notes seen only by other officers. Comments in officer notes are included in COPsync History.

Officer Created BOLO

Warn officers across the county, the state or the nation to be on the lookout.

BOLO [21]	Open Rpts [121]	Pending Rpts [2]	Rejected Rpts [0]
<ul style="list-style-type: none"> Attempt To Locate 2/21/2011 Officer Safety 2/15/2011 	2/21/2011	COPSYNC NETWORK	Be aware threat to law enforcement Threat To Shoot Officer

Traffic Warrant Database

Know each time officers make traffic stops on individuals with open class warrants.

At the Point of Incident

In a single interface COPsync brings unparalleled officer efficiency and access to information *directly into the patrol car.*

One Network Connecting all Vendors™

EFFICIENCY

- E-citation
- E-crash report
- E-DUI report
- Activity Log
- Racial Profile Reporting
- E-criminal Trespass

ACCESS

- Law Reference Library
- CJIS Database
- EPIC Database
- Crash Report Database
- Citation Database
- DUI Report Database
- Class C Warrant Database
- Law Enforcement E-mail Network

The network grows by 1,000's of new pieces of data every day as more and more officers submit actionable life saving information to The Network.

Critical information at the point of incident – that's ***The Network!***

Options and Upgrades

COPsync is a single source for not only the software but also the hardware you need to leverage the latest in patrol car technology. If your organization requires installation, we can help there too!
