

COMPANY OVERVIEW

InterCloud Systems, Inc. is a single-source provider of end-to-end information technology (IT) and next-generation network solutions including Software Defined Networking (SDN) and Network Function Virtualization (NFV) to the telecommunications service provider (carrier) and corporate enterprise markets through cloud solutions and professional services. InterCloud offers cloud and managed services, professional consulting and staffing services, and infrastructure and applications to assist its customers in meeting their changing technology demands. InterCloud's cloud solutions offer enterprise and service-provider customers the opportunity to adopt an operational expense model by outsourcing to InterCloud rather than the capital expense model that has dominated in recent decades in IT infrastructure management.
