

UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF GEORGIA  
ATLANTA DIVISION

SECURITIES AND EXCHANGE  
COMMISSION,

Plaintiff,

vs.

REVOLUTIONS MEDICAL CORP.  
and RONDALD L. WHEET,

Defendants.

Civil Action No. 1:12-cv-03298-TCB

**DECLARATION OF THOMAS RONK**

Pursuant to 28 U.S.C. §1746, I, Thomas Ronk, declare as follows:

1. I am over twenty-one (21) years of age, and this declaration is based on my personal knowledge.
2. This declaration is given in support of the Motions for Summary Judgment filed on behalf of Defendants in the above-styled action.
3. I am currently a Registered Investment Advisor in the state of California. I have been in the securities industry since 1992 when I was originally licensed as a registered representative. I am currently the principal of Century Pacific Investments, a registered investment advisory firm in Corona Del Mar, CA.

4. I am the chief executive officer and owner of Buyins.net (“Buyins”). Buyins is a research firm that compiles short sale time and sales data and publishes a proprietary SqueezeTrigger® price on all U.S. stocks.

5. I was also a partner in RegSHO.com which was a short sale compliance and market surveillance company. My partner in RegSHO.com was Harvey Pitt, former Chairman of the Securities and Exchange Commission.

6. Buyins’ data center aggregates data feeds from all 13 trade reporting facilities or exchanges in the United States. Every day it monitors every trade, the type of trade (e.g., buy, sell, sell short), the number of shares and the price at which the trade was executed. The data is then put into a relational database, and proprietary algorithms are run that accurately describe what is going on in a stock.

7. Regulation SHO under the Securities Exchange Act of 1934, took effect January 3, 2005, and provides a new regulatory framework governing short selling of securities. Regulation SHO requires bona-fide market-making activities to include making purchases and sales in roughly comparable amounts. It was designed with the objective of simplifying and modernizing short sale regulation and providing controls where they are most needed. At the conclusion of each settlement day, data is provided on securities in which: (1) there are at least 10,000 shares in aggregate failed deliveries for the security for five consecutive settlement days, and (2) these failures constitute at least 0.5% of the issuer's total shares

outstanding. Buyins monitors market makes daily for compliance with Regulation SHO.

8. On March 18, 2011, Revolutions Medical Corp. (“RMC”) retained Buyins.net to issue its findings regarding the short selling of shares of RMC.

9. On March 21, 2011, Buyins issued its report on short selling in RMC’s stock. A copy of that report is attached hereto as Exhibit A.

10. In its report, Buyins found that starting in August, 2010, short sellers began actively shorting RMC’s stock. It peaked during the months of August, September and October and then continued into the first quarter of 2011. As the Buyins report stated:

After careful analysis of RMCP short sale, naked short sale and market maker friction factor data it is clear that RMCP has had issues with short sellers who have consistently shorted the stock.

11. The chart on the top half of page 2 of the report entitled “Failures to Deliver (Naked Shorts) in RMCP Since 2004” shows that failures to deliver have been an issue in RMC’s stock since 2008. A failure to deliver results when there are more shares shorted than are available to borrow or when short sellers, for whatever reason, decide not to borrow the shares. On trade settlement the rightful owner of the shares that were purchased from the short seller is due to receive those shares. If the short seller does not deliver those shares to the purchaser, it is considered a failure to

deliver. When fails to deliver persist for 5 consecutive trading days, the company is listed on the Threshold Security List and should immediately be listed on the Hard-to-Borrow list as well. This activity peaked in August and September of 2010.

12. The chart on the bottom half of page 2 of the report entitled “New Daily Short Sale Trading Volume Starting 8-3-09” shows that short sellers consistently shorted RMC’s stock on a daily basis and that the daily trading volume attributable to short selling was 36.5% over the period from August 3, 2009 through March 18, 2011. Attached as Exhibit B to this declaration is the supporting data which shows the substantial amount of shorting that occurred in RMC’s stock, particularly during the months of August and September, 2010.

13. I declare under penalty of perjury that the foregoing is true and correct.

*[Signature on following page]*

This 15th day of August, 2014.

A handwritten signature in black ink, consisting of several overlapping loops and a long horizontal stroke at the end.

---

Thomas Ronk

BUYINS.NET offers a proprietary research and trading service uncovering illegal naked short selling in stocks on the NYSE, AMEX, NASDAQ, OTCBB and PINKSHEETS. For more information please visit [www.buyins.net](http://www.buyins.net)

**RMCP SHORT SELLERS**

**Starting in 2010 short sellers have actively shorted RMCP. Shorts have continued this activity which warrants close investigation. Buyins.net will report the results of its surveillance on a monthly basis.**

**OVERVIEW OF RMCP SHORT SALE DATA**

After careful analysis of RMCP short sale, naked short sale and market maker friction factor data it is clear that RMCP has had issues with short sellers who have consistently shorted the stock. Short sellers have been building a sizable

position in shares of RMCP and market makers have made a neutral market lately. New evidence of daily short sellers shorting shares of RMCP has now come to light as the SEC has finally given Buyins.net access to

DAILY short sale data which is updated every night. Protecting RMCP from abusive shorting is a high priority.

### FAILURES TO DELIVER (NAKED SHORTS) IN RMCP SINCE 2004

Failures to Deliver have been an issue in RMCP since 2008. Short sellers have been lax in complying with the more stringent locate provisions of Regulation SHO, but since September 28, 2010, have resolved failures to deliver prior to RMCP going onto the Threshold Security List.

### NEW DAILY SHORT SALE TRADING VOLUME STARTING 8-3-09

Shorts have been consistently shorting RMCP on a daily basis. An average of 36.5% of daily trading volume is short selling.

The above data is used to calculate if a fair market is being made in the shares of RMCP. 51% of recent trading days are positive or bullishly biased and 49% of trading days are negative or bearishly biased. There is a neutral market being made in RMCP in the past 37 trading days where shares traded.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock RMCP compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused RMCP's price to rise
2. If Friction Factor is negative, more selling than buying caused RMCP's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or
