Friction Factor calculates if a fair market is being made in the shares of RMCP. 46% of the previous 37 trading days have been positive or bullish-biased and 54% have been negative or bearish-biased.

Regulation SHO requires bona-fide market-making activities to include making purchases and sales in roughly comparable amounts. The Commission has stated that bona-fide market-making DOES NOT include activity that is related to speculative selling strategies or investment purposes of the broker-dealer and is disproportionate to the usual market making patterns or practices of the broker-dealer in that security. Likewise, where a market-maker posts continually at or near the best offer, but does not also post at or near the best bid, the market-maker's activities would not generally qualify as bona-fide market-making. Moreover, a market-maker that continually executes short sales away from its posted quotes would generally not be considered to be engaging in bona-fide market-making.

BUYINS.NET monitors RMCP market-makers daily for compliance with Fair Market-Making Requirements.

About BUYINS.NET

BUYINS.NET, <http://www.buyins.net>, monitors trading in all US stocks in real time and maintains massive databases of short sale and naked short sale time and sales data, short squeeze SqueezeTrigger prices, market-maker price movements, shareholder data, statistical data on earnings, sector correlation, seasonality, hedge fund trading strategies and comparable valuations. Reports include:

REGULATORY & COMPLIANCE NEWS

Friction Factor - market-maker surveillance system tracking market-makers to determine Price Friction and compliance with new "Fair Market-Making Requirements".

RegSHO Naked Shorts - tracks EVERY failure to deliver in all US stocks and all Threshold Security Lists daily for which stocks have naked short positions.

INVESTMENTS & TRADING

SqueezeTrigger - 37 billion cell database tracks EVERY short sale (not just total short interest) in all US stocks and calculates volume weighted price that a short squeeze will begin in each stock.

Earnings Edge - predicts probability, price move and length of move before and after all US stock earnings reports.

Seasonality - predicts probability, price move and length of move based on exact time of year for all US stocks.

Group Trader - tracks sector rotation and stock correlation to its sector and predicts future moves in ALL sectors and industry groups.

Pattern Scanner - automates tracking of technical patterns and predicts next move in stocks.

GATS - tracks all strategies
