**Overview**

ThermoEnergy Corp. is an integrated technologies company engaged in the worldwide development and sales of sustainable technologies for wastewater recovery and clean energy production. The company's water division (formerly CASTion®) is a leading provider of custom designed, turn-key wastewater treatment, chemical recovery and water conservation and reuse systems. The Company's energy division is developing a new advanced power plant design, known as the (POXC™) process, that combusts any fossil fuels and biomass into energy with zero air emissions (including NOx, SOx, mercury and particulates) as well as captures CO2 in pressurized liquid form for sequestration or beneficial reuse such as secondary oil recovery or methane recovery from non-minable coal beds.

Management Bios**Gregory M. Landegger - Vice President & Chief Operating Officer**

Prior to his appointment as Vice President, and Chief Operating Officer in September 2012, Mr. Landegger briefly served ThermoEnergy as a management consultant on a variety of initiatives, including its efforts to introduce the company's proprietary water recovery technology for application in the oil, gas and power industries. From May 2007 to January 2011, Mr. Landegger lead operational turnarounds in the private equity portfolio of W.R. Huff Asset Management Co., LLC and, from January 2011 to May 2012, was actively involved in identifying investment opportunities in the small cap market, with a focus on the packaging, industrial
